

Q1. What special care should you take when making Wudu?

A1. You must with great care wash the skin above and below the lips, nails, eyes, the hair on eyelashes, eyebrows, the skin underneath jewellery and even the hole pierced in the nose. If a pinpoint of it is left dry then the Wudu will not count. If you fear that water will not pass easily over these areas, then it is better to remove such items. You should also wash your hands and feet very quickly without leaving those parts exposed for a long time. This speed should not omit any part to be washed thoroughly. Make your Wudu in a private place. Do not make Wudu in the presence of ghair-mahram, those whom Islam allows you to marry.
